Average Kitchen Remodel Costs in the Inland Empire

Kitchen remodel costs in the Inland Empire vary significantly based on the scope of work, materials selected, and the size of your kitchen. Here's what homeowners in Yucaipa, Redlands, Beaumont, Highland, and surrounding communities can typically expect to invest in 2026.

Project Level	Cost Range	What's Included
Minor Refresh	\$15,000 – \$25,000	Cabinet refacing, new countertops, updated hardware, fresh paint, new backsplash
Mid-Range Remodel	\$35,000 – \$65,000	New cabinets, countertops, flooring, appliances, lighting, layout improvements
High-End Renovation	\$65,000 – \$120,000+	Custom cabinets, premium stone, wall removal, structural changes, professional 3D design, top-tier appliances

Pro Tip: The national average for a mid-range kitchen remodel is \$40,000–\$55,000. The Inland Empire tends to be 10–15% below major metro areas like Los Angeles, making it an excellent time to invest in your home.

Cost Breakdown by Component

Understanding where your money goes helps you make smarter decisions about where to splurge and where to save. Here's a typical breakdown for a mid-range kitchen remodel:

Component	% of Budget	Typical Cost (Mid-Range)
Cabinets & Hardware	28–32%	\$12,500 – \$20,000
Countertops	12–18%	\$6,000 – \$10,000
Flooring	7–10%	\$3,000 – \$5,500
Appliances	12–18%	\$5,000 – \$10,000
Labor & Installation	18–22%	\$8,000 – \$14,000
Plumbing & Electrical	5–8%	\$2,500 – \$5,000
Design & Permits	3–5%	\$1,500 – \$3,000
Lighting & Fixtures	3–5%	\$1,200 – \$3,000
Backsplash & Paint	3–5%	\$1,500 – \$3,500

Where to splurge: Cabinets and countertops have the biggest visual impact and the best ROI. Quality cabinets last 20+ years.

Where to save: Backsplash and paint are easy to update later. Choose a timeless design and save on trendy details that may date quickly.

Kitchen Remodel Timeline

One of the most common questions we get is 'How long will my kitchen remodel take?' Here's a realistic timeline based on hundreds of projects we've completed across the Inland Empire:

Phase	Duration	What Happens
Planning & Design	2–4 weeks	Initial consultation, measurements, 3D design renderings, material selection
Permits & Approvals	1–3 weeks	Building permits, HOA approvals (if applicable), final plans
Demolition	3–5 days	Remove old cabinets, countertops, flooring, fixtures
Rough Work	1–2 weeks	Plumbing, electrical, framing, any structural changes
Installation	3–5 weeks	Cabinets, countertops, flooring, tile, backsplash, appliances
Finishing Touches	1–2 weeks	Hardware, fixtures, paint, final inspections, cleanup

Total timeline: Most mid-range kitchen remodels take 8–14 weeks from design to completion. High-end renovations with structural changes may take 16–20 weeks.

Pro Tip: The design phase is the most important. At Construction Station, we use professional 2020 Design software to create a full 3D rendering of your new kitchen before we touch a single cabinet. You see exactly what you're getting before we start.

What Adds Value to Your Home

A kitchen remodel is one of the best investments you can make in your home. According to the National Association of Realtors, homeowners recover 75–80% of their kitchen remodel cost at resale. Here are the upgrades that deliver the best return on investment:

1. Open Concept Layout

Removing a wall between the kitchen and living area is one of the highest-ROI improvements. It creates a modern, spacious feel that today's buyers expect. Cost: \$3,000–\$8,000 depending on whether the wall is load-bearing.

2. Quality Countertops

Quartz and granite countertops are the gold standard. They're durable, beautiful, and virtually every buyer lists them as a must-have. Quartz typically costs \$60–\$130 per square foot installed in the Inland Empire.

3. Modern Cabinets

Shaker-style cabinets in white, navy, or white oak are the most popular choices in 2026. White oak in particular has become a major trend, offering warmth and a natural, modern aesthetic. Soft-close hinges and pull-out drawers are expected, not upgrades. Custom cabinets cost more but last decades.

4. Energy-Efficient Appliances

ENERGY STAR appliances reduce utility bills and appeal to environmentally conscious buyers. A stainless steel appliance package (refrigerator, range, dishwasher, microwave) runs \$5,000–\$10,000 for quality brands.

5. Proper Lighting

Layered lighting (recessed, pendant, under-cabinet) transforms a kitchen. LED under-cabinet lighting alone costs \$500–\$1,500 and dramatically improves both function and aesthetics.

5 Costly Mistakes to Avoid

1. Skipping the Design Phase

Many homeowners jump straight into demolition without a professional design plan. This leads to costly mid-project changes, delays, and a kitchen that doesn't function well. Always start with a professional 3D design — it costs a fraction of what rework costs.

2. Choosing the Cheapest Contractor

The lowest bid often means corners will be cut. Unlicensed contractors may skip permits, use substandard materials, or disappear mid-project. Always verify licensing (#1108879 for Construction Station), insurance, and references.

3. Ignoring the Work Triangle

The relationship between your sink, stove, and refrigerator determines how well your kitchen functions. A poor layout means years of frustration. Professional designers optimize this from day one.

4. Underbudgeting by 20%

Every kitchen remodel has surprises — hidden water damage, outdated wiring, or code requirements. Budget an additional 15–20% contingency fund so unexpected costs don't derail your project.

5. Forgetting About Storage

A beautiful kitchen that lacks storage is a daily frustration. Plan for pull-out pantry shelves, deep drawers, corner cabinet solutions, and vertical dividers for baking sheets. Function matters as much as aesthetics.

Why Construction Station

Construction Station Flooring and Design has been building dream kitchens across the Inland Empire since 2008. Here's why homeowners in Yucaipa, Redlands, Beaumont, Highland, and surrounding communities trust us with their most important room:

18 Years Experience

Hundreds of kitchens built across the Inland Empire. We know the local building codes, permit process, and what works in IE homes.

5-Star Reviews

17 five-star Google reviews with 100% customer satisfaction. We let our work speak for itself.

Licensed & Insured

CA Contractor License #1108879. Fully bonded and insured for your protection.

BBB A+ Accredited

Better Business Bureau accredited with an A+ rating. Your project is in trusted hands.

Free 3D Design

We use professional 2020 Design software to create a full 3D rendering of your kitchen before construction begins. See it before we build it.
